What else can be saved on my USB?

Open architecture USB, create and save your:

- Emergency Medical Card
- Medical Journal
- Medical Images (x-ray, CT scan, etc.)
- Immunizations
- Lab Reports
- Health Care Directives (Living Will, Power of Attorney forms)
- Electronic Medical Records (request from healthcare provider)

When Seconds Count...

Add an Engraved Acrylic Plate

In an emergency, should you become confused or unable to communicate, your medical alert USB product provides medical personnel with all of the details of your existing medical condition.

But... when time is most critical, can you depend on computer access?

The engraved acrylic plate alerts emergency responders to your most critical information at a glance.

Using Your Medical Alert USB Bracelet

MEDICAL IDS CAN SAVE YOUR LIFE.

Inserting your USB device

Compatible with any standard USB port

1. Locate the USB port on your computer

2. Insert the USB device, contacts should face the contact support tab.

3. The "Star of Life" icon should appear on your computer.

If your USB doesn't operate/initialize, it may have been inserted incorrectly*.

*Due to variations in computers, it is possible that your USB device has been inserted upside down.

How do I create and save my Emergency Medical Card?

START HERE: www.universalmedicaldata.com
